Nothing for the next week

An issue you will encounter

- **Students don't see an assignment**
 - **Students can't see a quiz**
 - **Did you click publish? If you didn't they can't see the assignment**
 - **Oh you did hit publish? Is the assignment/quiz part of a module? Is the module published?**
-

Another Issue

- Students **HAVE** to select submit with Google Drive (NOT Google Docs, NOT a link from their google doc)

The Biggest Issue you will Face with Canvas

- The biggest issue you will face is your own attitude towards Canvas
 - Do you have a growth mindset?
-

[Here](#) is a link to a video that shows how to convert your Google Classroom into a Canvas page. I **HIGHLY** recommend you watch it. Ignore the video when it says create course (your courses are already created)

How do I...

- [Make and add buttons?](#)
- [Get premade buttons?](#) Here is the link to the folder of my buttons, copy the contents and edit them how you like. These are not the fancy things that those teachers with apparently all the time in the world make.
- [Create a quiz?](#) (This video shows specifically how to add a box division problem involving using a coding language, but it also reviews the other elements of a quiz. I will put the code in the comments for any teachers that need it)
- [Add an assignment and attach a rubric?](#)
- [Have students submit a Google Doc/Slide/ETC.](#)
- Do anything else?
 - You have to learn how to Google things! It is part of digital media literacy and very important for everyone to learn. Speaking of digital media literacy [here](#) is a great way to teach it to students
